Kurume Azaleas

The Kurume Azaleas have been known to America only about 15 years, but in that time they have made wonderful progress as hardly a garden but what has one or more varieties of this wonder type of Azaleas. They are also well adapted to forcing—thousands of them being sold for Mother's Day, Easter and Decoration Day. They are comparatively easy to grow and they make such a wonderful display that the demand is continually increasing. Many of the varieties are hardy out of doors as far north as Long Island. They are extremely floriferous, and in season the blossoms often completely hide the leaves. The colors are of almost every hue and shade as you will find below.

Each X means one transplanting.

Varieties with an asterisk * are the hose-in-hose or double type.

Our Native Peat

To grow Azaleas and Rhododendrons successfully you must have leaf mold, peat in some form or some similar substance. We have used Russian, German and Holland Peat, leaf mold collected from under trees in our local forests, but by far the best material we have ever used is a form of native peat, a deposit of which we have found near here. It runs from twelve to twenty four inches thick and is composed of thoroughly decayed leaves, and other material in a maple swamp which has been generations in the making.

If you would like to try it we will send you a two-bushel bag for $1.00. Will quote special prices on carload lots or less. Try a sample bag, we believe you will like it so well you will want more.

Kaempferi Hybrid Azaleas

In these new Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts.

2 in. pot plants		$1.00	$ 7.50

Arnoldiana Azaleas

In 1914 the late Jackson Dawson, then superintendent of the Arnold Arboretum, at Boston, Mass, created a splendid new type of hardy Azalea by crossing Azalea Kaempferi and Azalea Amoena. Of the seedlings thus secured a considerable number of them were grown at Boston from their infancy until flowering age, when the following ones of unusual beauty and vigor of growth were selected, discarding most of the others as less desirable. They have carried through fifteen winters in Massachusetts without protection or injury.

Considering their hardiness, their ultimate size, bushy form, splendid foliage, abundant bloom and desirable shades of color, they well deserve the distinction as "the most outstanding achievement in American plant breeding in many years." The late Dr. Ernest Wilson referred to them as "truly beautiful Azaleas." Which from so eminent and conservative authority is indeed high praise.

All are happiest when growing in full sunlight. They are deciduous in the north but evergreen here. The reddish bronze colored autumn foliage is very pleasing.

	Each	10	100
BRIARCLIFFE. A deep rich, reddish pink, identical in color with the well known rose of that name.			
2 in. pot plants		$2.50	$20.00
9 to 12 in. pot grown	$1.00	8.50	
CARDINALIS. A dark cardinal red. This variety has the pleasing characteristic of developing new leaf growth with the flower.			
2 in. pot plants		$2.50	$20.00
DEXTER'S PINK. A bright, glistening pink, and a very good grower. We especially like this one.

New U. S. D. A. Azaleas

A group of new varieties of this wonderful June-blooming hardy evergreen Azalea released by the U. S. Department of Agriculture. Most of these were collected by the Department at the Agricultural College, Imperial University Komaba, in Tokyo, Japan. They have been tried out by the U. S. Department of Agriculture staff and other interested growers and have been selected as being worthy of introduction in this country. We were one of the original growers selected to propagate these for the trade.

In ordering these Azaleas please use the number following the name, this will insure you getting the variety you want.

Indica Azaleas

The Indica Azaleas are the most attractive winter flowering shrubs in the south. Varieties of Azalea Indica coming into flower when so little else is in bloom are a mass of beauty on private estates of the south in early spring. The famous Magnolia Gardens near Charleston, S. C., where many varieties of Azaleas are seen by throngs (special trains being run just to see these wonderful Azaleas) of visitors every spring, has been said to be the loveliest spot in America.

While these Indica Azaleas are not dependably hardy, even this far north, I believe they would make one of the best pot-grown Azaleas for forcing and selling in the northern markets. It would be no trouble to have them in bloom by Christmas. Get a few and try them out. They are most showy.

Hardy Hybrid Rhododendrons

Most everybody agrees that Rhododendrons are among the most showy of all the flowering plants, and most everybody would also like to grow some but the price has always been a great drawback to quantity planting. We believe you will find our prices low enough so that you can resell them at a fair price and still make a good profit. This collection is among the very best of the hardy hybrid varieties; all good growing and good flowering kinds. Push them a little and see how your sales increase. The smaller sizes are just right for lining out and growing on.

BOXWOOD, Continued

BUXUS SUFFRUTICOSA (Old English Dwarf Box). As a low edging in formal gardens there is no greater favorite than this variety of Box. This is the variety that is so much seen in Washington's garden at Mt. Vernon and in other noted gardens in Delaware, Maryland, Virginia, North Carolina and other Middle Atlantic States. Hardier than Sempervirens.

Ilex (Holly)

We consider the Holly one of the very best ornamental trees or shrubs. Nothing is prettier than one of our American Hollies with great clusters of bright red berries and dark green leaves shining above the snow in winter. The nurseryman who will grow a collection of Hollies to a specimen size will have something that he can sell whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell. We believe there is money in growing them and will increase our stocks as fast as we can. Our advice is plant some Hollies and in a few years we believe you will have some valuable property.

ILEX AQUIFOLIUM. (English Holly). This is not as hardy as the American Holly (Ilex Opaca) but can safely be planted from New Jersey southward. The foliage is a bright glistening green and the berries are larger than the American. Very beautiful.

Taxus (Yew)

It is only in the past few years that nurserymen in the United States have begun to really appreciate and grow the Yew. In England there are Yews more than a hundred years old, but unfortunately the English Yew (Taxus Baccata) is not reliably hardy in the North and many do not realize that the Japanese and many forms of Media are perfectly hardy in and around Boston, and the Japanese even in northern New England.

They are not so particular as to character of soil but they do appreciate a plenty of good plant food. They are immune to the many plant diseases and insects so destructive to so many other evergreens.

We think the Yew in its many species and forms can be used in most any and all places where any other evergreen will do well.

We honestly believe you will do well to plant and grow on some or many of these Yews.

	Each	10	100	1000
TAXUS BACCATA (English Yew). Widely planted in English churchyards. A good ornamental. Hardy as far north as New York City. Upright, dark green foliage. Very good for the South.				
6 to 8 in. trans.		$1.00	$7.50	
6 to 8 in. 3 yr. S.		.50	3.00	$25.00
TAXUS BACCATA AUREA (Golden English Yew). Leaves golden-yellow, more brightly colored at the tips and margin. This form has proven hardier than the type in New England.				
4 to 6 in. trans.		$1.00	$7.50	
TAXUS BACCATA COMPACTA. A dwarf tree-like shrub with upright branches and dark green foliage. Grows 4 to 5 feet tall.				
6 to 8 in. trans.		$1.25	$10.00	
8 to 10 in. trans.		1.50	12.50	
TAXUS BACCATA DOVASTONI. Branches are wide-spreading, nodding at the tips: leaves dull green when mature but light golden when young.				
4 to 6 in. trans.		$1.25	$10.00	
6 to 8 in. trans.		1.50	12.50	
TAXUS BACCATA ELEGANTISSIMA. A vigorous form of dense and compact habit, occasionally more open, with the young leaves striped pale yellow, the older ones with whitish margin.				
4 to 6 in. trans.		$1.25	$10.00	
6 to 8 in. trans.		1.50	12.50	
TAXUS BACCATA FASTIGIATA. (Irish Yew). A strictly fastigiate form, with stout crowded upright branches and branchlets: leaves radially arranged around the branches, dark glossy green, more obtuse than in the type. One of the most desirable evergreens of columnar habit for formal gardens. Would not recommend for planting north of Philadelphia, although it is hardy on Long Island.

4 to 6 in. trans.		1.50	12.50	
6 to 8 in. trans.		1.75	15.00	
TAXUS CANADENSIS. (Canada Yew). Low shrub usually diffuse and straggling but occasionally ascending and up to 6 feet tall. The hardiest of the Yews, but less handsome than the other species, one of the chief drawbacks being the reddish tinge the foliage assumes in winter.				
4 to 6 in. trans.		$1.00	$7.50	
6 to 8 in. trans.		1.10	8.50	
8 to 10 in. trans.		1.25	11.00	
10 to 12 in. trans.		1.50	13.50	
TAXUS CUSPIDATA. (Japanese Yew). For any and every purpose in which evergreens are required the Japanese Yew can be recommended. Perfectly hardy in the coldest parts of New England northward to Ottawa, Canada, immune from diseases or pests. Accomodating to an extraordinary degree, withstanding shade or full sunshine, dark green at all seasons of the year. Small wonder that this plant has been acclaimed Japan's greatest gift to the gardens of America.

We hope you will find something of interest in this little booklet and if you decide to send us an order, we promise that we will do our best to please you with the quality of the plants we send you and with the manner in which your order is taken care of.

TAXUS, Continued

The following varieties were grown from stock purchased from the late T. D. Hatfield. He selected these as being the best of his unnamed varieties and we are still carrying them under his original numbers. No. 18 is one of the most rapid growers of the lot and we believe it will make a good hedge plant.
